PROFESSIONAL SUMMARY

Full-Stack Web Developer with 3+ years of hands-on experience building and deploying production web applications with Laravel, Golang, React, and Vue. Information Systems student at Brawijaya University (GPA 3.86) expanding into data science and AI, with projects that integrate speech, gesture, and handwriting recognition into web platforms. Earned 11 podium finishes (7 first places) in national and university-level web and software competitions in 2026.

TECHNICAL SKILLS

- **Languages:** PHP, Golang, JavaScript, TypeScript, Python
- **Frameworks & Libraries:** Laravel, React, Vue.js
- **Data Science & AI:** Pandas, NumPy, Scikit-learn, Gemini AI, Whisper, MediaPipe, MobileNetV2, ONNX Runtime Web
- **Databases:** MySQL, PostgreSQL
- **Tools & Practices:** Git, RESTful API Design, Server Deployment (SSH, HTTPS/SSL), Payment Gateway Integration (Tripay), Web Accessibility (WCAG 2.2, ARIA)

PROFESSIONAL EXPERIENCE

Data Science Member, Basic Computing Community (Learning Community) Apr 2026 - Present

- Studying machine learning fundamentals and the basics of deep learning and neural networks.
- Completed a machine learning classification project for predictive modeling; building skills in data analysis and modeling.

Web Developer (Freelance), Jobnation Jan 2025 - Juni 2026

- Develop and maintain high-performance web applications with a focus on scalability and user experience.
- Collaborate with cross-functional teams to design reliable solutions and apply software engineering best practices.

Web Developer & Technical Mentor, PT Hummatech Jan 2024 - Dec 2025

- Built robust web applications with Laravel and JavaScript, improving system functionality and responsiveness.
- Mentored interns and vocational high school (SMK) students through real-world software development lifecycles and modern coding standards.

Web Developer Intern, PT Hummatech Jan 2023 - Dec 2024

- Assisted in developing and maintaining dynamic web applications across frontend interactivity and backend logic.
- Wrote clean, maintainable code and took part in team code reviews to safeguard product quality.

PROJECTS

QURAVA: Accessible AI-Based Quran Learning Platform Full-Stack Developer

React, TypeScript, Laravel (REST API, Sanctum), MySQL, Whisper, MediaPipe Hands, SVM, MobileNetV2, ONNX Runtime Web

- Built an accessibility-first web platform for Quran learning where users reach the same learning objective through voice, hand sign, or handwriting.
- Integrated three recognition paths: recitation transcription with Whisper, in-browser hand gesture classification (MediaPipe Hands, SVM, ONNX Runtime Web), and hijaiyah handwriting classification (MobileNetV2).
- Applied WCAG 2.2 practices: semantic HTML, ARIA, keyboard and focus management, and speech synthesis for non-visual feedback.
- Developed a teacher dashboard and relational data model (classes, learning history, student progress, teacher evaluations) for structured progress monitoring.

Coby Learn AI: AI-Powered Learning Platform Full-Stack Developer

Golang (REST API), React, Gemini AI

- Engineered an AI-powered platform that summarizes learning materials from PDFs, YouTube videos, and text.
- Integrated the Gemini AI model for automated summarization and smart learning assistance.
- Implemented gamification (daily learning streaks) to boost user retention and study consistency.

GetSkill: EdTech Platform Project Lead & Full-Stack Developer

- Led end-to-end development of a single-vendor e-learning platform, defining system architecture and project roadmap.
- Developed user authentication, structured course management, and frontend-backend integration.
- Integrated Tripay Payment Gateway for secure transactions and automated course access provisioning.

Dolfin Brain: Learning Management System Full-Stack Web Developer

- Built an LMS for CPNS exam preparation with role-based access control for premium and free content.
- Integrated Tripay for payment verification and course enrollment; designed a student dashboard to track learning progress.

PastiPanen: Agricultural Web Application Full-Stack Developer

Laravel

- Developed and managed a comprehensive web application for the agricultural sector.
- Handled full server deployment: environment configuration, SSH management, Git-based continuous updates, and HTTPS/SSL.

EDUCATION

Brawijaya University, Information Systems 2025 - Present

GPA: 3.86 | Focus: Business Intelligence, Information Systems, Data Science

SMKN 1 Kepanjen, Software Engineering (Rekayasa Perangkat Lunak) 2021 - 2024

Focus: Web Development and Information Technology

CERTIFICATIONS & AWARDS

- Machine Learning with Python, IBM (2025)
- Golang Bootcamp, Sanbercode (2024)
- Belajar Machine Learning untuk Pemula, Dicoding (2024)
- Data Visualization, Dicoding (2024)
- 1st Place, JKB Festival (Web Development, National, 2026)
- 1st Place, Inspire 1.0 (Software Development, National, 2026)
- 1st Place, Emosfest (Web Design, National, 2026)
- 1st Place, Web Creation Competition (Web Design, National, 2026)
- 1st Place, ITC Dinusfest (Web Development, National, 2026)
- 1st Place, MTQ UB XIX (Web Design, University, 2026)
- 1st Place, IT Fest (Digital Media Learning, National, 2026)
- 2nd Place, IT Convert (Software Development, National, 2026)
- 3rd Place, T-Arts (Web Design, National, 2026)
- 3rd Place, Dies Natalis HIMATIF ke-6 (Web Design, National, 2026)
- 3rd Place, Web Design Competition (Humanity OS) (Web Design, National, 2026)
- Finalist, National Data Analyst Case Competition (Data Analysis, National, 2026)
